

► Tip-up bucket

This bucket is built in steel tubular frames and sheeting and its size of its wheels depend on its specific capacity. It is equipped with two rubber shock absorber to soften impact of rotation. It can be used for the recovery and transport of any agglomerate or free flowing process waste. ON REQUEST: - This bucket can be supplied with cover. - The bin can be welded water tight so as prevent loss of liquid during movement. The bucket is equipped with forks; the lateral control lever allows for easy rotation through 120° and gradual emptying of contents; the operator is not required to descend from the fork lift truck to carry out this operation.
