Qualanod Anodising
standard 20+ microns
for all systems.

CUSTOM RAL

Wide colour selection available for all systems.

ADJUSTABLE SYSTEMS

Compatible with:

InstAlign+ is our very well-known adjustable system, designed by Baros from a special blend of plastic with twice the recommended UV protection, all moving parts made from Inox. Allows precise glass alignment in seconds and unrivaled strength.

Series : BV9900/BV8900

BV9900

BV9900S

BV9900L

BV9900Y

BV8900

BV8900S

NEW

InstAlign is our newest adjustable system, it features improvements and optimization over the original. Installation is up to 40% faster, it is more simplified and intuitive, it uses the same high-quality durable materials.

BV 9900

BASE MOUNT

BV9900 – is our innovative and most technically advanced glass railing. With over 15 months of development and prototyping, we were able to deliver ease of installation to a whole new level. Precise alignment of the glass is made from the safety of the inside of the balcony with just a hexagon M5 key, all done in seconds with an electric screwdriver. Its strength of up to 4kN using standard tempered laminated glass makes this system among the most desirable solutions on the Market.

Durability is a key priority not only for us but also for our customers. This is why we made the internal moving parts from Inox and we also use a special patented blend of plastic with twice the recommended UV protection. Rubber seals are made from the most durable EPDM and have the highest UV protection. BV9900 is a system that will withstand anything it's subject to like: Wind, Rain, Salt, and UV rays.

BV9900 successfully covered certification for residential, domestic, and industrial together with heavy human traffic applications. It is proven that the glass railing system is suitable for any usage.

Compatible with:

InstAlign+
Technology

Full certification available on our website www.barosvision.com/en/

KEY FEATURES

Adjustable profile
up to 4 kN
16.76-25,52 mm glass.

Precise alignment from
the inside of the profile.
Top and underfloor mount

5m channel
4 Anchors per meter

Length: 5000mm
Height: 125mm
Width: 76mm

Channel: 6.93 kg / meter
Total: 8.07 kg / meter

Aluminium: EN AW6060
Color: Inox, Natural, Raw,
Custom colour

Mounting anchors:
M10 / Concrete screw

Glass thickness:
8.8.2 / 8.8.4
10.10.2 / 10.10.4
12.12.2 / 10.10.4

Strength:
8.8 – up to 3 kN
10.10 – up to 4 kN

Maximum height:
8.8 – up to 1300 mm
10.10 – up to 1500 mm

FINISH OPTIONS :

To produce the BV9900 we use the highest quality series of aluminium EN AW 6063, it is well known for its extreme strength and elastic resistance designed to work with 16.76-25.52mm glass.

BV9900L

BASE MOUNT

BV9900L – is our adjustable system based on BV9900 which offers great flexibility and usage. With its L-shape it allows installation on the edge of the concrete. The system can be integrated into the floor. BV9900L can also be used as a glass awning. Precise alignment of the glass is made from the safety of the inside of the balcony with just a hexagon M5 key, all done in seconds with an electric screwdriver. Its strength of up to 4kN using standard tempered laminated glass makes this system among the most desirable solutions on the Market.

Durability is a key priority not only for us but also for our customers. This is why we made the internal moving parts from Inox and we also use a special patented blend of plastic with twice the recommended UV protection. GLASS FIXING SYSTEMS

Compatible with:

NEW

WedgeFix L

Technology

WedgeFix L is our glass fixation by use of plastic wedges. This is a popular design but improved with the added:

UV protection - our wedges will much longer last when exposed to UV rays, humidity, and salt.

Anti-shock protection - reduces the change of glass breakage caused by pressure while fixing the glass ...

Series : BV7600/BV7500/BV6500/BV4500

BV7600

BV7600Y

BV7600L

BV6500

BV6500L

BV4500

NEW

WedgeFix S

Technology

... **Anti-pullout protection** - regardless of the internal or external, static or dynamic forces our wedges offer maximum grip and remain inside the profile holding the glass.

BV7600

BASE MOUNT

BV7600 is our newest in-house designed glass railing system for top mount. This budget-oriented system provides a sleek finish, ease of installation, and requires minimum maintenance. The glass is secured in seconds using wedges and a wedge inserter. The wedges and profile design are ridged to remove the possibility of loose wedges which is a common problem with this type of design. You can rest assured that even after heavy use the system will keep its integrity.

Durability is a high priority for us and for our customers, this is why we made the internal parts from special plastic with UV protection. The rubber seals made from EPDM are perfectly suited for exposure to the sun thanks to their UV protection. BV7600 can be used for any meteorological conditions. Every part of this system has been designed to ease the installation and to reduce the risk factors associated with it.

With our experience in the field, we know the technical challenges that can arise and so we designed the system with extra care. **BV7600** successfully covers all residential and domestic applications. With certification for up to 2kN.

Compatible with:

BV7600Y

BASE MOUNT

BV7600Y is our newest in-house designed Y-shaped glass railing system for side mount. This budget-oriented system provides a sleek finish, ease of installation, and requires minimum maintenance. The glass is secured in seconds using wedges and a wedge inserter. The wedges and profile design are ridged to remove the possibility of loose wedges which is a common problem with this type of design. You can rest assured that even after heavy use the system will keep its integrity.

Durability is a high priority for us and for our customers, this is why we made the internal parts from special plastic with UV protection. The rubber seals made from EPDM are perfectly suited for exposure to the sun thanks to their UV protection. **BV7600Y** can be used for any meteorological conditions. Every part of this system has been designed to ease the installation and to reduce the risk factors associated with it.

With our experience in the field, we know the technical challenges that can arise and so we designed the system with extra care. **BV7600Y** successfully covers all residential and domestic applications. With certification for up to 2kN.

BV7600L

BASE MOUNT

BV7600L is our newest in-house designed glass railing system for base or underfloor mount with L-shape, designed to be mounted closer to the concrete edge than regular BV7600. This budget-oriented system provides a sleek finish, ease of installation, and requires minimum maintenance. The glass is secured in seconds using wedges and a wedge inserter. The wedges and profile design are ridged to remove the possibility of loose wedges which is a common problem with this type of design. You can rest assured that even after heavy use the system will keep its integrity.

Durability is a high priority for us and for our customers, this is why we made the internal parts from special plastic with UV protection. The rubber seals made from EPDM are perfectly suited for exposure to the sun thanks to their UV protection.

BV 4500

BV 6500

BASE MOUNT

BV6500 is our heavy-duty budget-oriented glass railing system that offers industrial strength. Our team of in-house engineers designed the profile so it would provide easy and fast installation, with minimum maintenance required. The glass panels are secured in seconds using wedges and a wedge inserter.

Same as all of our glass railing systems the risk of breaking the glass during installation is reduced to a minimum. The **BV6500** profile and its wedges are ridged as that removes the possibility of loose wedges which is a common problem with this type of design. We can guarantee that profile will retain its integrity even after heavy use when it is mounted in places with large human traffic.

Strength and durability are priorities for every glass railing. This is the reason why the internal parts are manufactured using special plastic with added UV protection and the rubber seals are made of EPDM with excellent UV protection. Glass railing system **BV6500** can be used in every meteorological condition. Every part of this glass railing system is made in such a way that it ensures an easy and problem-free installation.

BV 6500L

BASE MOUNT

BV6500L is our L-shaped system that can be used as a glass canopy or glass railing. Specially designed by our engineers, this railing system has industrial strength, offers easy installation, and requires very little maintenance after it is mounted. The glass panels are secured in seconds using wedges and a wedge inserter.

Due to its unique L-shape and careful choice of materials, we have minimized the chance of breakage of the glass panel upon installation. The profile is fixed to the facade/wall, without the risk of breaking the concrete. The wedges and profile are ribbed, as this helps eliminate the possibility of loose wedges, something that can be a drawback in this type of design. You can rest assured that even after heavy use the system will keep its integrity.

Durability is the main priority for us as well as for our clients. This is the reason why the internal parts are manufactured using special plastic with added UV protection and the rubber seals are made of EPDM with excellent UV protection. The glass railing system **BV6500L** can be used for every meteorological condition. Every part of this glass balustrade has been planned to ease the installation and the associated risk factors.

BULGARIA

WAVE RESORT

This Ultra All inclusive hotel situated in Aheloy has won the award Building of the year for Innovative design. Clear glass.

**BUILDING OF
THE YEAR**

AWARD 2020

BV 4500

BASE MOUNT

BV4500 is our compact but extremely sturdy glass railing system. At a height of just 80mm this technical marvel of a system provides ease of installation, great strength, and requires minimum maintenance. The glass is secured in seconds using wedges and a wedge inserter. As with every glass railing system that we offer, the main factors here are strength and durability.

For the manufacturing of the internal parts of **BV4500**, we have used special plastic and rubber seals from EPDM. The design of the parts makes the system suitable for exposure to the sun thanks to its UV protection. **BV4500** can be used for all meteorological conditions. Thanks to our experience in the field we have designed the system in such a way that the installation is easy and all the technical obstacles that could arise during the process are eliminated.

BV4500 successfully covers all residential and domestic applications while being small and barely noticeable. This system is certified at 2kN.

BV2500 is our handmade stainless steel post for glass railings made of 304 stainless steel. Designed by our team of installers and manufactured by hand in our factory. We also offer a side-mounted variant.

BV2500 is installed with chemical or mechanical anchors and it can hold a glass of 12mm-25.52mm. It provides the flexibility of installation as it can be used on balconies, stairs, and even for awnings and canopies as it is extremely durable. Securing the glass is achieved with custom-made standoffs / glass adapters. The exceptional corrosion resistance makes this system a practical choice for different environments. For superior corrosion resistance the adapters can be made of 316 stainless steel upon request. The system can be finished with a decorative aluminium slimline handrail (BV6023) for limitless look or with a standard square (BV6024) or round handrails (BV6022).

BV2500 is a good choice for staircases, glass railings, and balustrades.

Full certification available on our website
www.barosvision.com/en/

Our stand on quality over quantity is the foundation upon which the company was built and owes all its success to. Every product is checked once before packaging and once before being sent out to ensure our customers receive exactly what they ordered, every time.

In 2020 we built a new base on Asenovgradsko Shose where we took the optimization of the production another step further.

- So whatever you are looking for:
- quality glass railings
 - quality aluminium railings
 - quality Inox railings
 - quality innovative glass railings
 - quality regulated glass railings

You can trust Baros Vision as your supplier.

All products are made in Europe.
You can find us at sales@barosvision.com

Quality manufacturing in accordance with ISO 9001: 2015

NEED GLASS ?

With talented and highly qualified professionals, BarosGlass offers the well-known and complete range of products and services for architects and private clients. Working alongside some of the world's leading architects, BarosGlass is aiming to be the number one supplier for luxury glazing projects in Europe. We work with all the latest and greatest glass processing machines on the market. We laid our foundations upon 35,000sq/m of factory space with a production team of over 250 highly trained personnel.

What we can offer:

- Laminated glass
- Tempered glass
- Anti-hurricane glass
- Curved glass
- Digitally printed glass
- Insulating glass
- Floors and stairs
- Structural glass
- Bulletproof glass
